

Fas-Trak Industries is proud to introduce another breakthrough innovation performance solution.

The Scorpion is designed specifically for the challenges of the retail flooring industry such as: restricted access, shelf stocking challenges, tight or hard to reach areas as well as limited drying conditions. Easily sets up in a minute and applies BIB finish directly from the container! No transfer - No cleaning - No waste. Weighs only 12lbs. Transport is simple and requires little training.

The Scorpion takes the sting out of your challenges to achieve professional results and saves you money & precious natural resources.

FAQ's

Q. How does the Scorpion work?

A. Simply lay the BIB down on the Scorpion with the spigot toward the floor. Turn the spigot on partially and walk at a controlled pace. Go back to your starting point and spread the finish using the Stinger applicator and continue.

Q. How much of a "bead" do I apply?

A. Based on extensive testing a 4" wide bead will yield 1700 sq/ft per gallon. If you need less adjust your spigot accordingly. There is a short learning curve similar to any basic cleaning technique.

Q. Which BIB floor finishes can be used?

A. Depends on the manufacturers product. The dimensions for the Scorpion where the BIB is housed is 16 1/2 inches long x 9 1/4 inches wide. Check your BIB to assure a correct fit.

SCORPION

Retail Floor Finish Applicator

SPECS AND FEATURES

- Apply some manufacturers 5 gallon BIB floor finish at 9,000 sq/ft hour
- Zero waste - Save money and truly "Be Green"
